YMCA of Greater Dayton Corporate Staff, Executive Directors and Board Members,

For nearly four years, I have advocated for the safety, privacy and protection of women and girls in private spaces.

This advocacy journey has deepened my faith and understanding of God's love for me and his love for all women and girls.

The YMCA has been deceptive and dishonest. My name and the names of other women and girls whom I have come to know, have been slandered. As leaders, you have failed to address the concerns of many women. I ask each of you to read this document with an open mind, as it likely contains information and perspectives that may be new to you.

It is my Xenia YMCA story in my own words. I may not be a great writer but I am highly motivated by my great disappointment with the YMCA and my love for women and girls and the safety, privacy and dignity that they deserve.

Even though my trust in YMCA leadership has been shattered, I continue to believe that God will be glorified in all of this. I am hopeful that the YMCA can once more become an organization that genuinely serves everyone while safeguarding ALL members.

Respectfully,

Janell Holloway
